Now, I am going to read you two statements about School Choice programs. Please tell me which of the following statements comes closest to your opinion.

Some people say that we should have school choice programs which allow parents to use some of the money that government would spend to educate their child in traditional public school to send them to the public, private or charter school of their choosing.

Other people say that school choice programs only hurt public schools. They say that school choice programs take critical resources away from public schools resulting in school closures, and teachers and faculty losing their jobs.

Thinking again about Big Tech, I am going to read you some proposed solutions to address the issues caused by Big Tech. Please tell me which one comes closest to your opinion.

- **Federal Gov't**: The Federal Government should use anti-trust laws to break up Big Tech companies that are too powerful and abusive, just as we have done in the past with oil, steel and telephone companies.
- **Congress**: Instead of breaking up the Big Tech companies the Federal Government should pass laws through Congress to address specific abuses that Big Tech commits.
- **State by State**: It is up to the individual states to address the problems that may exist with Big Tech companies.

Abortion
As you may have heard, the Supreme Court will soon rule on whether or not to keep the landmark abortion ruling known as Roe v. Wade. If the court strikes down Roe v. Wade each state will have to decide their own abortion laws. With this in mind, which of the following statements comes closest to your opinion?

**Send Back to States**

The Supreme Court should send the issue of abortion back to the states, allowing states to end the radical practice of abortion on demand without restriction, up until the moment of birth, and allow each state to decide what restrictions they want to place on abortion.

**Keep As Is**

The Supreme Court should not send the issue of abortion back to the states because that will effectively take away a woman’s right to choose in many states.

Again, thinking about abortion, please tell me if you agree or disagree with each of the following statements.

It is wrong to allow abortions after 15 weeks when unborn babies can suck their thumb and feel pain. For this reason, abortion after 15 weeks should only be legal in cases of rape, incest or when the life of the mother is threatened.

Again, thinking about abortion, please tell me if you agree or disagree with each of the following statements.

An unborn baby is a human being.
Again, thinking about abortion, please tell me if you agree or disagree with each of the following statements.

Currently, America is one of only seven countries, including China and North Korea, that allow abortion for any reason, for all 9 months of pregnancy, up to the moment of birth. It’s time we allow states to place reasonable restrictions on abortion.
Again, thinking about abortion, please tell me if you agree or disagree with each of the following statements.

Whether you are pro-life or pro-choice, we can all agree that taxpayer money should not be used to pay for abortions.

Again, thinking about abortion, please tell me if you agree or disagree with each of the following statements.

Upon taking office President Biden issued Executive Orders eliminating a number of Trump policies with regard to immigration. Because of this President Biden is to blame for the massive rise in illegal immigration and chaos on our southern border.
Again, thinking about abortion, please tell me if you agree or disagree with each of the following statements.

It is the job of the Federal Government, not the states, to protect and control our borders. The current crisis of illegal immigration is President Biden’s responsibility and the states should not be forced to use state resources to enforce our immigration laws.

President Biden should reinstate some of President Trump’s previous immigration laws like keeping asylum seekers in Mexico while they await a hearing.

Ballot harvesting, which is the practice of allowing partisan political operatives to gather large numbers of absentee or mail-in ballots, is ripe with opportunities of fraud and should be outlawed.
